### News from the World of Pharmacology

Summer doldrums, Dog Days of Summer, whatever ... since last I wrote, there has been only one new (primary care) drug approved and perhaps two or three new indications or dosing revisions for existing drugs. I will include those in next month's article. Since I recently started to revamp my pharmacology lectures for this fall, including one on antibiotics, I thought I'd share some musings I've had on that subject.

Hope you don't mind a slight departure from the usual format. I'll be back to the updates in September.

### Hot Off the Press - *Pediatric & Neonatal Dosage Handbook*, 18th Edition

The new [Pediatric & Neonatal Dosage Handbook, 18th Edition](#) is now available. This handbook was formerly known as the *Pediatric Dosage Handbook*, but has been updated with expanded neonatal dosing information divided into a separate field for easy access. The changes made to this edition of the handbook are similar to those made to the Lexicomp On-Hand™ and Lexicomp Online™ databases.

Recently, Lexicomp™ released expanded and enhanced neonatal dosing information to the Pediatric & Neonatal Lexi-Drug database. With neonatal dosing for more than 250 drugs, this database now has significantly more coverage of this high-risk population than any other resource. If you haven't already updated Pediatric &
